Positioning error CDF: Qwen direct output vs linear probe
empirical CDF
great-circle distance to ground truth (km, log scale)
Qwen direct - valid (n=130, median 43.8 km)
Qwen direct - train (n=499, median 15.5 km)
probe (raw L11) - valid (n=130, median 953.8 km)
probe (raw L11) - train (n=500, median 662.4 km)
