A9: coverage density and spatial concentration
Latitude coverage per unit area
train
valid
samples per cos(lat) unit
latitude (deg)
Nearest-neighbour distance
(medians: 136 / 188 km)
train -> train
valid -> train
ECDF
nearest-neighbour distance (km, log)
Spatial concentration (Lorenz)
train: 148 cells, Gini 0.44
valid: 82 cells, Gini 0.27
cumulative sample share
fraction of occupied 10-deg cells (sorted by count)
