A7 world: CV vs valid per-sample errors (solid = CV OOF, dashed = valid; L8 = CV best, L2 = valid best)
squared error: heavy tails drive the mean
L2 CV OOF (R0): MSE 369, median SE 47
L2 valid: MSE 158, median SE 45
L8 CV OOF (R0): MSE 361, median SE 60
L8 valid: MSE 159, median SE 46
ECDF
per-sample squared error (deg², log scale)
great-circle distance: typical cases agree
L2 CV OOF (R0): median 988 km
L2 valid: median 978 km
L8 CV OOF (R0): median 1074 km
L8 valid: median 944 km
ECDF
great-circle distance (km, log scale)
